

ASTRONOMY CAMP RAP

Performed at Adult Astronomy Camp
April, 1990

We went down to Tucson
To Astronomy Camp
To sing a little song
We call Astronomy Rap
--rap --rap

We met Roger Angel
Who's really just fabulous
He showed us how to make
Mirrors into parabolas
--rap --rap

Then we cruised up the mountain
The clouds were just like soup
We pulled on all our warmest clothes
And took a look at Jup
--rap --rap

The morning came
We had the raves
Cuz we listened to Kim
Discuss space junk & waves
--rap --rap

Then those of us / who are on the go
We took a little hike / out through the snow
And we listend to Todd
Who's NOT deadpan
Talk about space missions
...all unmanned
--rap --rap

It was lookin' real cloudy
But we're a positive crew
We heard Ray White
Talk of Machu Pichu
--rap --rap

The clouds stayed up
(Most hit the sack)
But some stayed up
To do Astronomy Rap

--ya rap --ya rap
about Astronomy Camp

--ya rap --ya rap
and that's Astronomy Camp Rap!
